***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, drawn to peptides, classified in class 530, subclass 300.
- II. Claims 4-5, 9-13 and 14-15, drawn to methods of treating Staphylococcus infection with structures containing a modified Trp, classified in class 424, subclass 184.1.
- III. Claims 6-8, 9-13 and 16-17, drawn to methods of treating Staphylococcus infection with the structure (Fmoc)NH-CHR-COOH, classified in class 514, subclass 2.

Additionally, Groups I-III are further restricted in view of MPEP 803.04 which sets forth that biological molecules with different sequences are different inventions. Accordingly, Applicant is required to select a single structure (e.g., SEQ ID NO: 2, 3, 4, 5 or 6 if electing Group I, or a single modified structure Fmoc-L-Trp(Boc)-OH, Fmoc-2-aminobenzoic acid, etc, if electing the method of Group III).

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II & III are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method of treating Staphylococcus infection can be readily practiced with numerous well known antibiotics, e.g., tetracycline.

Art Unit: 1645

Inventions II and III are distinct since they both encompass treatment of Staphylococcus infection with molecules of a separate and distinct structure.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their separate classification and their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
